

A woman with long blonde hair is shown in profile, looking at a lush hanging garden. The garden is filled with various green plants, including succulents and trailing vines. The scene is set against a dark, blurred background, possibly at night or in a dimly lit indoor space. The lighting is soft and focused on the plants and the woman's face.

LUXURIOUS HANGING
GARDENS COLLECTIONS

www.wazoutdoor.com

CREATE AN EXTRAORDINARY OUTDOOR FEATURE WITH A LIVING ARTWORK

The WAZ Outdoor Hanging Gardens Collection comprises meticulously created giant kokedama of 50-85kg that elegantly, almost magically hover in the air. The collection offers a choice of three “habitats” – The African, The Amazon and The Sahara. A spectacular addition on a patio, atrium, along a walkway or any outdoor area that could do with a showstopper!

The Hanging Gardens are skilfully constructed using intricate stitching to form a lush tapestry of moss, soil and the crowning glory: a luxurious combination of plants carefully selected by our horticultural expert. There are 12 to 15 different plant species per Hanging Garden, including a few rare finds. Please note that the selection is subject to season and availability.

The design is both functional and aesthetically delightful with characterful nodes and ridges from which spectacular greenery springs to life. This combination of greenery is unique every time, making your Hanging Garden truly one-of-a-kind and extra special.

THE AMAZON

Inspired by the abundance and exotic charm of the jungle.

This lavish display of greenery features a striking ensemble of plants that flourish in shade/semi-shade, including delicious monster, ivy, bromeliads and ferns.

A vertical garden wall is shown, featuring a variety of plants. At the top left, there are plants with thick, rounded, reddish-purple leaves. Below them, a dense patch of green moss covers the wall. In the center, a cluster of variegated ivy with yellow and green leaves and purple stems hangs down. To the right, a plant with long, narrow, green leaves is visible. The background is a soft-focus view of more greenery and a building with a yellow and white striped pattern.

THE AFRICAN

Inspired by Africa's breathtaking untouched landscapes.

With indigenous beauties such as hen and chickens, natal ivy, succulent bulbs and asparagus fern, this glorious green feature is suited to semi-shade/morning sun areas.

A vertical terrarium, possibly a hanging planter, is the central focus. It is densely packed with various types of succulents and a thick layer of green moss. On the left, a succulent with thick, rounded, green leaves and reddish-brown edges (likely a Sedum) grows from a woody stem. To its right, a cluster of small, needle-like green plants (spekboom) is visible. Further right, a trailing succulent with small, rounded leaves and blue-tinted edges hangs down. At the bottom, a large, rosette-shaped succulent with thick, pointed, blue-green leaves and reddish tips (likely a Echeveria) is prominent. The background is a soft, out-of-focus warm light, suggesting an indoor setting with natural light. A metal chain is visible at the top right, holding the planter.

THE SAHARA

Inspired by the rare splendours of the desert.

A wonderfully waterwise option, the Sahara comes alive with hardy delights such as stonecrop, spekboom, coral reef and blue chalk. Well-suited to areas where sunlight abounds.

TAKING CARE OF YOUR HANGING GARDEN

Whether livening up an atrium, patio, wall or walkway, WAZ Outdoor's Hanging Gardens are unique botanical masterpieces that require careful consideration when planning their final destination.

Understanding your garden's exposure to sunlight, rain and wind will all play a part in ensuring the health and longevity of your Hanging Garden.

WAZ Outdoor will endeavour to offer professional advice regarding your installation options, irrigation methods and the basic maintenance of your magnificent Hanging Garden.

The rest is your love and care!

The sheer size and weight of the Hanging Garden, and the delicacy of these living plants, makes it extraordinary!
